PROJECTS

Here are all completed and on-going community and professional projects.

PNC Alumni Association - Charity Trip (Project Coordinator) - A community project we aimed to help students at one rural area school in Siem Reap province, Cambodia. There, we provided some study and living material for ~50 students & teachers. We raised funds from various sources and having many participants attended the trip. Besides the materials, we shared inspirations amongst them.

WiFi Indoor Location Performance Analysis - This is part of my master thesis. The project is to collect the records of real-time locations for different devices from various uniformly random location. Then we use some statistically techniques to analyze and give conclusion and recommendation. The work is published at https://ieeexplore.ieee.org/document/8905238

SKILLS & PROFICIENCY

Linux & Cisco Configuration

Windows Server

Python Scripting

DevOp & Net. Security

PHP & NodeJS

HTML5 & CSS
